Tunable Color Correction Between Linear and Polynomial Models For Noisy Images
Ryo Yamakabe, Yusuke Monno, Masayuki Tanaka, and Masatoshi Okutomi
Tokyo Institute of Technology

Introduction: Color correction for noisy images

1. Simulation results with different parameter values for SG chart

2. Cost function of training matrix

3. Proposed tunable color correction (TCC)

4. Visual comparison for hyperspectral images

5. Numerical comparison: Average RMSE
